Introduction

This report provides, in tabular format, the statistical information regarding the services within the Home Based Therapeutic Service (known as HBTS). The tables include, but are not limited to, the number of cases worked with, individuals worked with, number of referrals, new and re-contact cases, cases closed, and key demographic details. This information provides an indication of service performance and is used to determine the profiles of service users attending the various services.

The data contained in this report is based on information submitted by the services to the Research Team in February 2018. Where applicable, the report provides data on an individual level as well as on a family level. It is important to note that the same individuals may stop and start attending a given service multiple times in the reporting year and/or may be attending one or more services concurrently within the reporting period. As a result, the summing up of services may lead to an over-estimation of the number of individuals attending the agency.

This report would not have been possible without the kind assistance of each worker who diligently provided the data and of the people who keyed in all the data.

The data contained in this report is subject to revision and modification, as and when the relevant information becomes available.

Glossary of Terms

Variable	Definition
Year of referral	The year when a case was referred to the unit. A case may be referred more than once in a year. Some cases may be referred but placed on a waiting list or not taken up because the service was not appropriate for the person's needs.
Year Service Opened (or Case Service Opened)	The year in which a case was opened or allocated. This includes new cases and re-opened cases and so the same case may be seen more than once in a year.
Year of Opening (or Case opening)	The year when a case was new to the unit. Cases can only be termed a new case once. If the case is re-opened then it will not be recorded here but it is recorded under Year of Service Opening.
Year Service Closed	The year in which the case was closed or terminated. The same case may be closed more than once in a year if the case was re-opened in the year.
New	A new case which was opened or activated for the first time ever within the reporting year and which was never previously worked with
Re-contact	A case which was worked with and closed in the past and it has been re-activated or re-opened within the current reporting year
Known	Cases which were activated or opened in the previous reporting years and they are still active in the current reporting year. This may also be referred to as cases carried over from previous years.
Index person/ primary person	A person identified as the primary or main person to be provided service to. They may be accompanied by other family members or persons who would be considered as significant others or secondary service users.
Individuals worked with	The total number of individuals whose case was new, re-contact or known at least once in the year. This excludes cases re-opened in the same year and excludes persons who were referred but their case was never opened.
Cases worked with	The number of cases which were new, re-contact or known in the reporting year. This does not indicate the number of individuals as some individuals could attend the service more than once in the same reporting year. For example 1 individual may have re-

	contacted the service 3 times in the same year and would account for 3 cases worked with in the same year.
Family case	The service works with families. A family case may consist of: <ul style="list-style-type: none"> - One individual who attends in the year on their own without any other family member, or - A number of individuals identified as part of the same family attending in the year.
